---

This thread discusses the Content article: New Website

It looks great !

Way better then the previous layout!

Oh yeah, reminds me.

I would need a logo. Want to keep the header itself, but the "mylansite2 font there sucks. I am bad at making logos.

Not some leet photoshop extravaganza. A clean, recogniseable logo would be great.

If anyone nows somebody, I can post the PSD file for the header graph here and you can play around (maybe I should make a contest? :) )
