## Basic Clan tools?

Posted by Latebalazoo - 2007/10/29 12:21

---

Hi all,

I've been looking for clan components/modules/whatever for Joomla! and found now this. I was wondering could this work nicely as a basic clan tool? What we need is a members section, match results, next matches.

Has someone used mls tools for that?

Thanks, Late

My Components are purely for Lanparties. But have a look at these:

Joomla clan Members  
Joomla Clan Awards 2.0

And somebody seemed to have started something here:  
Joomla Clan Components

I basically just ran a search on Google for joomla+clan. Surely you must find some others too...

Cheers
