
Fatal error with com_mls_paypal 0.1.1

Posted by allright - 2007/11/08 07:01

Hi all,

I've installed com_mls_paypal 0.1.1, however when I click the "configuration" from the component menu, the following error message comes:

Fatal error: main() : Failed opening required " (include_path='.:usr/lib/php') in /home/sinabiz0/public_html/shopex/administrator/components/com_mls_paypal/admin.mls_paypal.php on line 6

I am using Joomla 1.0.13, could you please kindly advise what's the problem? thank you.

Best,
allright
