
Suggestion: Waiting list

Posted by bctrainers - 2007/12/09 12:07

Would it be possible in a future version to add in a part to the myLanSite Event listings for a waiting list?

So like if the LAN event is full, it will than take the user to another page saying that the event is full and they are being set onto the waiting list asking if they wish to confirm. However, the waiting list be added on as the normal event user list attending the event. With an icon or some sort denoting that they are on the wait list. :)
