## [SOLVED]Fatal Error. Fresh install on Joomla 1.5

Posted by Fishguy - 2008/06/03 02:15

---

Hey everyone,

Recently installed MLS on Joomla 1.5 and I've run into a bit of a problem...

Every time I try to access MLS tournaments from the components drop down in admin section, i get the following error messages:

Warning: main(../administrator/components/com\_installer/installer.class.php): failed to open stream: No such file or directory in ../administrator/components/com\_mls\_tournaments/admin.mls\_tournaments.php on line 28

Fatal error: main(): Failed opening required '../administrator/components/com\_installer/installer.class.php' (include\_path=.:usr/local/lib/php) in ../administrator/components/com\_mls\_tournaments/admin.mls\_tournaments.php on line 28

Don't suppose anyone can give me a hand?

Thanks,  
Benjamin

Anybody fancy testing com\_mls\_events on Joomla 1.5 for me? I kinda got it working on my testmachine and can provide willing testers with a Zip. Didnt test much, just got it loading and clicked through a few pages. So a tester should be willing to go through all the options and try as many things as possible to check that it works.

If this goes smoothly, I will continue on making the rest of the components run on Joomla 1.5 (legacy mode - obviously)
