
participants not shown in front end

Posted by andygray - 2007/02/06 21:44

I cant see the participants in the front end, but in the back end they ar all in order.

i have tried to remove the seat collum, but with no effekt. now i only have the name and payd collum in the frontend.

Can eny body help me:(

sorry for my bad english:unsure:

Re:participants not shown in front end

Posted by moensch - 2007/02/07 12:58

Hi,

I just released com_mls_events 0.1.5 which should resolve this problem. Can you please upgrade and let me know if you still have the problem or if it has been solved?

cheers
Samuel

Re:participants not shown in front end

Posted by andygray - 2007/02/07 13:43

Now the participants is shown, but i think it is a bug. when i update my contack info i get a php error inn
mls_events.config.php:ohmy:

Re:participants not shown in front end

Posted by moensch - 2007/02/07 14:25

Can you show me the error?

Re:participants not shown in front end

Posted by andygray - 2007/02/07 14:46

this is the error that comes

Parse error: syntax error, unexpected ';' in
/customers/dalanelan.org/dalanelan.org/httpd.www/ny/components/com_mls_events/mls_events.config.php on line 3

and it effects both the front and backend

Re:participants not shown in front end

Posted by waldoman - 2007/02/07 16:05

With the new update, i still cant see the participants on the front end or the backend.
I'm running Joomla stable 1.0.12, and php version 5.2.0.
I've tried downgrading to mylan ver. 1.0, and also installing community builder, but still isnt workin. Any advice?

I get this error everytime i try to save anything in the event configuration, it's probably the same for you. It's kind of pain in the butt since i want to remove some elements from the participant list. :pinch:

Re:participants not shown in front end

Posted by moensch - 2007/02/08 20:45

can somebody send me their mls_events.config.php?

=====

Re:participants not shown in front end

Posted by waldoman - 2007/02/08 22:49

My mls_events.config.php is the default packed in 1.5.
I also tried creating a fresh database, and installtion of joomla to match, then installing mylan component, and also trying it on a new installation of joomla 1.5 beta, but still no luck.

Re:participants not shown in front end

Posted by andygray - 2007/02/09 00:51

I will send you my config file, but to whitch adress?

=====

Re:participants not shown in front end

Posted by moensch - 2007/02/09 07:18

Are both of you guys using Joomla 1.5?

myLANsite has not been tested on Joomla 1.5 and I do not expect it to work.

=====

Re:participants not shown in front end

Posted by andygray - 2007/02/09 07:30

No, i
m not using 1,5. I'm using 1.0.12:blink:

=====

Re:participants not shown in front end

Posted by moensch - 2007/02/09 09:31

ok. Can you paste your config into the forum?

=====

Re:participants not shown in front end

Posted by andygray - 2007/02/09 12:42

hear it is, it works fine as long as i dont save the config. (whith fresh install)

```
<?php
$cnf_mls_events = 0;
$cnf_mls_events = 0;
$cnf_mls_events = 1;
$cnf_mls_events = "";
$cnf_mls_events = "";
$cnf_mls_events = "";
$cnf_mls_events = 2;
$cnf_mls_events = "myLANsite Lanparty Event!
```

Infos:
Location:
Street:
Town:
Parking:
Price:
Participants:
Visitors:
Minimum Age: ";

```
$cnf_mls_events = array();
$cnf_mls_events->value = "joomla.username";
$cnf_mls_events->text = "Username";
$cnf_mls_events->value = "mylansite.subscribed";
$cnf_mls_events->text = "Subscribed";
$cnf_mls_events->value = "mylansite.paid";
$cnf_mls_events->text = "Paid";
$cnf_mls_events->value = "mylansite.checked_in";
$cnf_mls_events->text = "Checked In";
$cnf_mls_events->value = "mylansite.checked_out";
$cnf_mls_events->text = "Checked Out";
?>
```

=====

Re:participants not shown in front end

Posted by moensch - 2007/02/09 13:31

But this config file that you pasted now seems to be working.. ?

=====

Re:participants not shown in front end

Posted by andygray - 2007/02/09 16:49

yes i know, but the error that i wrote about som post ago is that, when i have changed something in the config i get the error when i saves it:(

So i dont know what can be wrong, but i would like to edit it, becuse i want to change the language! To norwagion like the rest of the lan components:silly:

=====

Re:participants not shown in front end

Posted by andygray - 2007/02/13 22:52

No one that will help me?:blink: Is it anybody else that has this problem?:ohmy:

=====

Re:participants not shown in front end

Posted by moensch - 2007/02/14 06:15

Eerm... sorry, but I don't get you here. You cannot change the `_language_` of the component in the `mls_events.config.php`. This is done in the joomla global configuration....?!

=====

Re:participants not shown in front end

Posted by andygray - 2007/02/14 13:32

thats not the problem, but when i do any changes in the myLANsite Events: Configuration section. and saves it i get this
Parse error: syntax error, unexpected ';' in
`/customers/dalanelan.org/dalanelan.org/httpd.www.ny/components/com_mls_events/mls_events.config.php` on line 3

=====

Re:participants not shown in front end

Posted by moensch - 2007/02/14 14:16

Yes. And you gave me a copy of your config. But the config you gave me did not have this error.

Can you give me a copy of the config which `_does_` have the error?

Well, I go to this URL:

http://dalanelan.org/ny/components/com_mls_events/mls_events.config.php

And It does not complain. Which is rather weird... And I cannot reproduce the problem.. which is weird as well :)

=====

Re:participants not shown in front end

Posted by waldoman - 2007/02/26 23:34

so whats the deal on this? Are we just waiting for your new 1.5 version to come out then? My participants still arent showing. :(

=====

Re:participants not shown in front end

Posted by moensch - 2007/02/27 05:43

If somebody can actually give me information I can work with, I will quite happily find a solution. But at the moment I have.. eeermmm.. let me think... nothing!

If you have the error and can give me access to your website (admin account, ftp access) I will have a look and try to find the error.

As I said, I do not have the error on any of my installations, therefore I cannot find a solution. I need access to a system where the error exists. I have said that before but nobody has given me access. So I havent fixed it yet.

Makes sense?

Re:participants not shown in front end

Posted by thanetm - 2007/02/27 12:04

The config file basically looks like this when it has the error:

```
<?php
$cnf_mls_events = 0;
$cnf_mls_events = ;
$cnf_mls_events = 1;
$cnf_mls_events = "";
$cnf_mls_events = "";
$cnf_mls_events = "";
$cnf_mls_events = ;
$cnf_mls_events = "myLANsite Lanparty Event!
```

Infos:
Location:
Street:
Town:
Parking:
Price:
Participants:
Visitors:
Minimum Age: ";

```
$cnf_mls_events = array();
$cnf_mls_events->value = "joomla.username";
$cnf_mls_events->text = "Username";
$cnf_mls_events->value = "mylansite.subscribed";
$cnf_mls_events->text = "Subscribed";
$cnf_mls_events->value = "mylansite.paid";
$cnf_mls_events->text = "Paid";
$cnf_mls_events->value = "mylansite.checked_in";
$cnf_mls_events->text = "Checked In";
$cnf_mls_events->value = "mylansite.checked_out";
$cnf_mls_events->text = "Checked Out";
?>
```

and it gets upset when the extcal integration is not enabled. i just go and manually put either "" or a number before the offending semi-colon and it gives me my page back.

So it basically saves
\$cnf_mls_events = ; and \$cnf_mls_events = ;

without a value which it doesn't like.

Hope that helps a bit!

=====

Re:participants not shown in front end

Posted by moensch - 2007/02/27 12:56

Thanks, finally something we can work with :)

Can you replace your admin.mls_events.php with this file and let me know if now the mls_events.config.php gets saved correctly, even with ExtCal disabled?

download

Re:participants not shown in front end

Posted by thanetm - 2007/02/27 13:10

yes - i can enable and disable the calendar integration with careless abandon now! :laugh: and it still saves properly!

EDIT: just noticed that the Approve Events: defaults to Always Approve, even if you change it, it will bounce back to Always approve.

Re:participants not shown in front end

Posted by moensch - 2007/02/27 13:40

Can you download again? The link from below should still work. Updated the file.

But I still find it funny. I never had this problem even without the modification in the file...

Re:participants not shown in front end

Posted by thanetm - 2007/02/27 14:10

Get this now:

Events category:

Notice: Undefined index: extcal_category in

C:\htdocs\leagb\administrator\components\com_mls_events\admin.mls_events.html.php on line 993

Approve Events:

Notice: Undefined index: extcal_approve_mode in

C:\htdocs\leagb\administrator\components\com_mls_events\admin.mls_events.html.php on line 997

/*****/

sorry - that's what you get when the extcalendar is not installed. now that i have reinstalled it everything seems to be behaving. :woohoo:

(i am having various issues and deleted everything and started again!)

Re:participants not shown in front end

Posted by thanetm - 2007/02/27 15:24

new update.

I started fresh and just installed the lang, events and paypal components. The participants are unavailable in the front end as everyone else has complained of.

I then installed seatmap, teams, tournament, even though i don't need them and the participants are now showing... :P narrowed it down to seatmap! add that and you can see the participants.

Post edited by: thanetm, at: 2007/02/27 16:29

Re:participants not shown in front end

Posted by moensch - 2007/02/27 15:54

Yep. That makes sense. In the participants list I try to display the seat of the user. If com_mls_seatmap is not installed, the tables do not exist and the query fails. I probably have to put some "if"-statements in there and only try to load the seat if com_mls_seatmap is actually installed. Nice hint - thanks!

Re:participants not shown in front end

Posted by waldoman - 2007/03/06 22:33

Well Hot Damn it worked! Thanks for the tip, i can finally use this software!
:laugh:

ehem ... paypal... *ehem*... :)

Re:participants not shown in front end

Posted by Azrayal - 2007/06/24 21:59

Hi,

Thanks to this thread my issues were resolved up to one point, now I have a list of attendees but its only showing the numbers of the attendees and not anything else.

ie.

- 1
- 2
- 3
- 4

but no information is being presented.

anyone??

Re:participants not shown in front end

Posted by jlazerus - 2007/08/03 21:49

My participants are not being shown either. I can see 1 2 3 but no names. I tried removing seat but it will not let me in the configuration.

Re:participants not shown in front end

Posted by boostman - 2007/10/03 19:16

Under Events Config do you have the correct fields selected to display the information you want?

Re:participants not shown in front end

Posted by jlazerus - 2007/10/03 19:31

If I try to change the configuration of the Frontend Participants list, I get a debug error on line 341, object expected.

Re:participants not shown in front end

Posted by moensch - 2007/10/04 06:54

Can you please paste the whole error message? Thanks.

Re:participants not shown in front end

Posted by jlazerus - 2007/10/04 13:30

Line: 341

Char: 1

Error: Object expected

Code: 0

Re:participants not shown in front end

Posted by Fishguy - 2008/06/05 04:38

Hi there....

I see it's been a while since anyone has posted in here.

I am having the problem where I cannot see all of the participants in the front end.

I can see 1 user and no one else... It does say "Results 1 - 2 of 2" but I can only see the first user.

I am using the most recent versions of MLS events, teams, lang-class, seatmap and paypal.

I am running all this on an installation of Joomla 1.0.15

http://www.projectx2009.com/joomla/index.php?option=com_mls_events&task=show_participants&eventid=1

I have done some tinkering in the code, including changing some wording in the language file and removing the "back to event list" link.

Any help would be appreciated.

-Benjamin

Re:participants not shown in front end

Posted by Fishguy - 2008/06/05 11:42

Never mind, I figured it out... I had created a couple users on the back end and they did not show as "approved" so they did not appear in the participants list...
