## Warning in participants list

Posted by joerg.t. - 2007/09/22 20:40

---

Hello,

latest mls components installed on joomla 1.0.12 and first event run fine. Now the second event is on the horizon and I get errors in the events-participants list.

Error Message:

Warning: mysql\_query() : Unable to save result set in /var/www/web26/html/cms/includes/database.php on line 289

No results in the list are shown when I select my 2. event. If I choose the first event all participants are shown without errors... why?

Cheers Jörg

I had a similar problem when i had 1 person assigned as using 2 seats in the same room. just removed the 2nd occupied seat and it cured the problem.

Possibly worth clearing the seating plan from 1st event ?

I get this error when checking the participants list :

Warning: mysql\_query() : Unable to save result set in /var/www/vhosts/drweb.be/httpdocs/2008/includes/database.php on line 302

This morning it was just fine, I could all 54 participants and I set 2 users in status paid without any problem... Now I can only see the first 50 participants.

Since then, there were 3 subscriptions (total of 57). I deleted those 3 directly in mysql, put the problem remains...

Any idea would be more than welcome...

Greetz,  
DrWeB :(

I can still add new participants to MLS and on the front-end you can see all the participants...

SOLVED !

A user reserved 2 seats just as thelynx said...  
Stupid me...

Thanx anyway !
